## Centra Linear Valve VDE...M/VXE...M

### 2-Way and 3-Way Small Linear Valves PN16

Pressure-balanced

#### APPLICATION

These small linear valves are used in combination with small electric linear valve actuators for the control of hot and/or chilled water for fan coil units, small reheaters/recoolers in electric/electronic temperature control systems.

Because of the pressure-balanced plug, the close-off pressure is equal to the system pressure.

#### SPECIAL FEATURES

- Pressure-balanced
- Standard external threads for flat sealing connections
- Range of fittings available for different connection types
- Adjustment cap for manual operation
- Easy mounting of actuator via standard M30 x 1,5 screw connection

#### TECHNICAL DATA

Media	
Medium:	Water with max. 50 % glycol according to VDI 2035
Operating temperature	
DN25 - DN40:	2...130 °C
Connection/Sizes	
Valve size:	DN25 - DN40
Actuator:	M30 x 1.5 mm
Specifications	
Model:	2-way valve: VDE 3-way valve: VXE
Action:	Stem up to close port A-AB
Stroke:	6.5 mm
Rangeability:	50:1
Nominal pressure rating:	PN 16
Leakage rate:	≤ 0.05 % of $k_{vs}$
Flow Characteristics:	Linear for port A-AB Linear for port B-AB

## CONSTRUCTION

Overview	Components	Materials
	<b>1</b> Valve body	Brass resistant to dezincification
	<b>Not depicted components:</b>	
	Stem	Stainless steel
	Plug	Brass, EPDM seals

### METHOD OF OPERATION

All types of valves should be mounted in the return flow. If the  $\Delta p$ -values exceed 60 kPa, attention should be paid to the development of noise.

A built-in return spring produces a closing force.

The valves are supplied with an adjustment cap for manual operation and to protect the stem. This allows the stem set up for filling or initial heating/cooling during the building construction phase without the use of a controller or actuator.

The small electric valve actuators provide automatic control during the opening and closing movement of the valve stem.

#### VDE Valves (2-way valves)

Direction of flow always from port A to port AB

Port AB: Outlet

### INSTALLATION GUIDELINES

#### Mounting

When installing the valve care must be taken that the flow direction is correct (see chapter Method of Operation). The valve must not be mounted with the stem pointing downwards.

The adjustment cap must be removed from the valve only when the actuator is fitted. The valve should be installed as stress-free as possible with a tightening torque of 25 to 30 Nm.

The valve is supplied complete with mounting instructions.

#### VXE Valves (3-way valves)

These valves are preferably used as mixing valves, this means:

Port AB: Total flow outlet

Port A: Controlled flow inlet

Port B: Bypass inlet
